

# H/CAMS

H/CAMS is our comprehensive family of applications, databases, and services dedicated to crude assay management. Tools include Property Calculator, Yield Blend, Flash Assay Updater, Assay Data Converters, and Output Interfaces. Connect to our supported commercial assay libraries.

- User Friendly Graphical Interface
- Tray Efficiency Modeling
- Automatic Flash Assay Updates
- Blend Optimizer
- Cut Point Optimization & Swing Cut Modeling

## COMPREHENSIVE CRUDE ASSAY MANAGEMENT

### Crude Assays

- Access & process any number of crude assays
- Add new crude assays and update old data easily

### Properties & Qualities

- Graphically smooth, extend, and compare property curves
- Predict cut qualities for crudes and cut points for towers

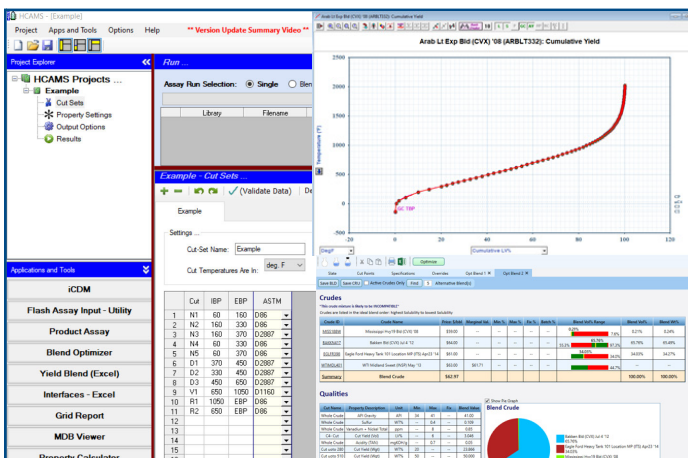

### Blend Optimizer

- Determine best mix of crudes to meet property specs
- Find most economical blend opportunities

### Automatic Interfacing

- Link and feed assay data to planning and scheduling tools
- Link to Process Simulators
- Auto Interface to other tools

## WHO IS USING H/CAMS

Major Oil Corporations  
Engineering Firms  
Research Organizations

Consulting Companies  
Laboratories  
Testing Facilities
